Back cylinder service package – Ultimate chill-cast quality

The chill-cast back cylinder plays a decisive role for the smooth functioning of a coating machine and for production quality. In combination with our original scraper blades, it ensures that the backs of the coated sheets remain absolutely clean.

The original chill-cast back cylinder from KBA-MetalPrint is manufactured in Germany, using a special material alloy for exceptional hardness. The surface is furthermore characterised by its extremely low average roughness, which serves to guarantee reliable and trouble-free production.

The original chill-cast back cylinder from KBA-MetalPrint –
for a profitable coating process and top quality.

KBA-MetalPrint now offers you the possibility to replace your old chill-cast back cylinder with a new, peak-condition cylinder – quickly, simply and at favourable cost.

Special prices for the chill-cast back cylinder service package

for coating machine 460	€ 13,500
for coating machines 4040, 470, 480, 483, 490	€ 15,500

Our special service package comprises

- an original KBA-MetalPrint chill-cast back cylinder for coating machines
- 5 Original KBA-MetalPrint scraper blades in high quality for longest service life
